"The Level B Certification process is both rigorous and very value-adding, comprising of Exam, Simulation Workshop and Interview. The simulation and role-based scenario was a fascinating exercise because it quickly generated a realistic project setting. Working with other candidates in a short period of time forced us to be more efficient and productive and it put core leadership qualities to test. The Assessors provided unbelievably valuable and extensive feedback on each part of the exercise, as well as outlining areas of improvement. For me, the Interview was the most critical part of the process, particularly so, because of the way the Assessors addressed various Project Management Competences and provided extremely valuable feedback, making the interview an eye-opening experience".
